## 12 Introduction

13 The EU Data Protection Directive (95/46/EC) sets the legal framework for attribute release within the European  
14 Union and European Economic Area. For more information on the requirements imposed, see Introduction to Data  
15 protection directive [DirectiveIntroduction].

16 The Data Protection Code of Conduct sets out practices for meeting the requirements of the Data Protection  
17 Directive. It defines a set of rules to be followed by Service Providers wishing to receive user attributes from the  
18 Identity Providers managed by Home Organisations. It is expected that Home Organisations will be more willing to  
19 release attributes to Service Providers asserting the conformance to the Data Protection Code of Conduct. For more  
20 information, see Introduction to Code of Conduct [CoCIntroduction].

21 This document defines a SAML 2.0 Entity Category attribute [SAML2EntityAttr] for Service Providers that claim  
22 conformance to the Data Protection Code of Conduct and a SAML 2.0 Entity Category support attribute for Identity  
23 Providers that are willing to interact with Service Providers conforming to the Data protection Code of Conduct.

## 24 Syntax

25 The following URI is used as the Attribute Value for the Entity Category attribute and Entity Category support  
26 attribute:

27 `http://www.geant.net/uri/dataprotection-code-of-conduct/v1`

## 28 Semantics

29 By asserting membership in the Entity Category, a Service Provider claims

- 30 • that it is bound by
  - 31 ○ the data protection laws in the European Union or European Economic Area, or
  - 32 ○ a third country's domestic data protection laws which have been recognised by the EC as ensuring  
33 an adequate level of protection [ECWhiteList], or
  - 34 ○ an international commitment into which a third country has entered and which has been recognised  
35 by the EC as ensuring an adequate level of protection [ECWhiteList],
- 36 • that it has committed to the Data Protection Code of Conduct for Service Providers [CoCforSP], and
- 37 • that it conforms to the SAML 2 Profile for the Data Protection Code of Conduct [CoCSAML2]

38 By asserting the Entity Category support attribute, an Identity Provider claims that it releases the requested  
39 attributes to a Code of Conduct committed Service Provider without administrative involvement.

## 40 Provenance

41 When an Entity's registrar (normally the Entity's home federation) registers the Entity's assertion of membership in  
42 the Entity Category it must perform at least the checks defined for a home federation operator in the Operator  
43 guidelines document [CoCOperatorGuidelines].

44 No requirements are defined for the provenance of an Identity Provider's Entity Category support attribute.

## 45 Examples

46 Entity Category attribute (Service Provider):

```
47  
48 <EntityAttributes xmlns="urn:oasis:names:tc:SAML:metadata:attribute">  
49   <Attribute xmlns="urn:oasis:names:tc:SAML:2.0:assertion"  
50     NameFormat="urn:oasis:names:tc:SAML:2.0:attrname-format:uri"  
51     Name="http://macedir.org/entity-category">  
52     <AttributeValue>http://www.geant.net/uri/dataprotection-code-of-conduct/v1</AttributeValue>  
53   </Attribute>  
54 </EntityAttributes>
```

56 Entity Category support attribute (Identity Provider):

```
57  
58  
59 <EntityAttributes xmlns="urn:oasis:names:tc:SAML:metadata:attribute">  
60   <Attribute xmlns="urn:oasis:names:tc:SAML:2.0:assertion"  
61     NameFormat="urn:oasis:names:tc:SAML:2.0:attrname-format:uri"  
62     Name="http://macedir.org/entity-category-support">  
63     <AttributeValue>http://www.geant.net/uri/dataprotection-code-of-conduct/v1</AttributeValue>  
64   </Attribute>  
65 </EntityAttributes>
```

## 68 Usage

69 Enable Home Organisations / Identity Provider administrators to easily set up a global attribute filter policy for  
70 Service Providers committed to the Code of Conduct.

## 97 Document History

### 98 Changes from Version 1.1, 24 October 2014

- 99 • Removed references to the Safe Harbour arrangement that has been invalidated by the European Court of Justice.
- 100 • Corrected links in the References section.

101

### 102 Changes from Version 1.0 Erreta 1, 10 June 2014

- 103 • Introduced an Entity Category support attribute and a related example.
- 104 • Corrected links in the References section.

105

### 106 Changes from Version 1.0, 14 June 2013

- 107 • Reformatted the Examples section to remove misleading white spaces from the <AttributeValue> element
